

Modern Masonry Architectural Line (MMAL)

# Ground Face

*Innovation by ...*

Ground Faced Masonry products are designed for internal or external applications combining inherent self-finished decorative appeal with the strength and durability of a masonry unit. Available in all standard sizes, colours, as well as our large format block. Our Ground Faced units offer either a rough grind or a honed finish for your project. Ground Face masonry units are pre-finished integrally colored concrete block with one or more faces ground to expose the colours of the natural aggregates. Units can also be bullnosed or chamfered on one or multiple faces.

**One-Step Installation:** Ground Face Series masonry units provide finished load-bearing or non-load-bearing walls in a single trade, one-step operation. You save time and money.

**Maintenance Free:** Ground Face units are virtually maintenance free! There's no need to repaint or refinish.

**Low Life-Cycle Costs:** The Ground Face finish will last the sustainable lifetime of your building.

**Easy-to-Clean:** Ground Faced masonry units can be cleaned with a variety of masonry cleaners. Contact Day & Campbell Limited to find an approved cleaner.

**Sealer:** Faceal Oleo HD is the only sealer recommended for our products. The sealer performs in a few different ways, but ultimately everything that it does leads to protection and preservation of your assets value. It is an invisible nanotechnology sealer, meaning that you cannot tell that it has been applied. It is virtually invisible. It does not change the water vapour diffusion characteristics of the substrate (so it remains breathable). It serves as protection against graffiti, water, oil and grease-based contamination. It also helps facilitate the cleaning of and removal of chewing gum, ice and algae. It is also very resistant to mechanical abrasion further protecting the finish. Faceal Oleo HD has very good self-cleaning characteristics for exterior or shower applications. The pollution cannot penetrate the surface so the rain or shower water washes the debris away. Faceal Oleo HD is non-reversible and constitutes a so-called permanent graffiti/pollution protection system. It comes with a 10 year warranty. Contact us for more information.

**Mould and Moisture Resistant:** Manufactured with an integral water repellent admixture, Ground Face masonry units repel moisture and prevent mould and efflorescence.

**Durability:** Structural integrity and durability make Ground Face the perfect choice for your institutional, commercial or industrial project.

**Design Flexibility:** Ground Face units offer you freedom of expression in design through a wide variety of colours, shapes and scoring patterns. Day & Campbell Ltd also offers custom chamfers and bullnosing.

**Large format Units:** Create large-scale walls, columns and accents. Our large format ground face masonry units are available in all colours.

**Fire Protection:** Depending on the thickness and internal configuration of the block, Ground Face offers up to a 4-hour fire rating.

**Sound Absorbing:** Ground Face is also available in ACOUSTA-WAL sound-absorbing units. Together Ground Face and ACOUSTA-WAL are your indoor/outdoor solution to sound absorption and control.

**Applications:** Interior and exterior.
